

HOUSES OF WORSHIP INSTALLATION

The Parish of St Andrew and St Mark, Surbiton

Located just outside of London, St Mark & St Andrews Church in Surbiton has been catering to the community around the Surbiton and Kingston areas for many years with their extensive services all year round. The church is comprised of two main areas which required sound reinforcement from TOA - the main hall and the smaller meeting area.

To bring out the best of the acoustics within the main hall, TOA installed the SR-H2S to ensure optimum coverage and a precise sound quality throughout such a large main hall. The hall is also where the M-633D and the S5.3 Wireless System resides. The smaller room is equipped with the BS-678 which is perfect for a smaller sized room and also controlled from the central mixer located in the rack situated in the main hall.
